History of Asian Whisky

Japanese whisky is a style of whisky developed and produced in Japan. Whisky production in Japan began around 1870, but the first commercial production was in 1924 upon the opening of the country's first distillery, Yamazaki.

Broadly speaking the style of Japanese whisky is more similar to that of Scotch whisky than other major styles of whisky.

Taiwanese Whiskey: Kavalan was a dark horse when it first came on the global scene 13 years ago -- until the Taiwanese whisky beat three Scotches and one English brand at a blind tasting held on Scotland's famed Burns Night in 2010.

Japanese Mizunara Oak

Mizunara oak... it has a curious ring to it.

Scarcer than European and American oak, and much more expensive, its story is deeply rooted in Japanese history.

At the end of World War II, Japan faced shortages of medicine, food and other daily necessities. The lack of imported casks to age whisky was the least of the country's problems. But the spirit was popular with the occupational armed forces, so whisky makers had to do something. Distillers began to use the native oak,

mizunara.

Today, many whiskies from Japan, the U.S. and even Scotland use mizunara. Add the word to any label, and odds are those bottles won't last long on shelves.

Mizunara needs to be around 200 years old before it can be cut and used for casks.
